COLLEGE
OXFORD

The Exeter College Online Tutorial Programme, Exeter College in the University of Oxford
A year-round online guided research (tutorial) programme

The Exeter College Online Tutorial Programme (ECOTP) offers a unique opportunity to experience Oxford's world-renowned *tutorial system* – 1-to-1 discussion-based research offering a rare level of personalised attention from academic experts – with the added convenience of studying year-round from anywhere in the world.

If you are intellectually curious and passionate about your subject, we would love to hear from you!

Oxford University's outstanding global reputation for teaching and research is based around conversations, usually in small groups of 2 or 3, known as 'tutorials', which emphasise *depth of knowledge* and *critical thinking*. ECOTP offers unparalleled access to Oxford academics and gives you the opportunity to further your studies by conducting personalised research under the 1-to-1 supervision of an expert in your field, producing a body of high-quality, substantial research work over 6-8 weeks.

ECOTP tutorials provide the ideal basis for subsequent work on a thesis and will give you experience of supervised research that itself is the strongest preparation for postgraduate studies.

You have the option of (1) proposing your own research project and developing a personalised curriculum, or (2) if you are looking for more structure, choosing from a list of subjects, each with a prescribed course and reading list. Whichever pathway you choose, you will be fully supported throughout your studies.

In addition, regular meetings with your tutor allow your progress to be closely monitored.

Exeter College invites applications from intellectually ambitious students in full-time higher education studying at universities and colleges from across the world with a cumulative GPA of at least 3.6, or equivalent.

To apply and for further information please visit the website or contact the Programme Director:
